# Dupe Detective Now Enables Multi-Bank Processing

MANCHESTER CENTER, Vt.--([BUSINESS WIRE](#))--CONIX Systems, Inc., the industry leader in duplicate payment prevention, announces the release of [Dupe Detective](#) 4.0 to be available in June 2009.

As electronic payments continue to increase, payment duplication poses even greater risk for financial institutions. With Release 4.0, Dupe Detective's capabilities have been expanded to meet the demands of institutions that process payments for multiple banks or credit unions.

New features contained in this release include:

- Duplicate detection for outgoing cash letters
- Duplicate protection for individual banks and credit unions in a multi-bank environment
- Improved management reporting by bank
- Web access for duplicate suspect review and disposition by individual bank

"Dupe Detective continues to meet the ever-changing needs of the financial services industry," said Frank Stokes, president, Technology Group of CONIX Systems. "Many financial institutions and industry service providers require one system that provides duplicate protection for multiple banks and credit unions. Release 4.0 accomplishes that."

Stokes further explained, "While operating on a single copy of Dupe Detective, the operations of multiple banks can be configured independently by establishing a unique set of user-controlled filters, business rules, and security settings. This greatly simplifies the management of duplicate payment processing in a multi-bank environment."

By leading the industry in offering the first multi-bank support for duplicate prevention, CONIX Systems continues to listen and respond to customer needs.

## About CONIX Systems

CONIX Systems, Inc. is a world leader in providing payment processing software and related services to the financial services industry. The company's products process an estimated 100 billion paper and electronic items each year and handle virtually every aspect of payment processing – including work flow management, balancing, branch

capture, corporate capture, and electronic check presentment. CONIX software and services are used by approximately 90 percent of the largest banks in the country. Founded in 1992, the company is headquartered in Manchester, Vt., with offices throughout the United States.
