

KeyMark Partners with KnowledgeLake, Inc

LIBERTY, S.C. (July, 2008) – KeyMark Inc, a leading document management solution provider based in Liberty, SC, today announced its partnership with - KnowledgeLake, Inc. to bring full Microsoft SharePoint integration capabilities to their customers.

KeyMark's solution with KnowledgeLake provides KeyMark customers the ability to implement a document management system on top of the SharePoint platform. KeyMark has an extensive history selling high-end Enterprise Content Management (ECM) systems, and now will be able to offer a SharePoint-based system that is straightforward, scalable and moderately priced.

SharePoint integration will be especially beneficial to the following industries; Healthcare, Finance, Government, Insurance and Higher Education. "This solution allows companies in our core industries to implement a document management strategy that is scalable and inexpensive," stated KeyMark CEO Jim Wanner. "Companies are becoming more and more interested in SharePoint's capabilities and with this partnership we will be able to utilize KnowledgeLake's capture software to scan documents directly into the SharePoint document repository utilizing a familiar Microsoft Office interface."
